

Carpet Mat Cleaning & Maintenance Instructions

The above products should be vacuumed daily using a commercial vacuum with a power head containing a beater bar.

For spot and stain removal, hand wash or extract stains with a carpet spotter using a water-based carpet detergent or shampoo.

Periodically clean the mat with a carpet extractor using a water-based detergent or shampoo. When using a carpet extractor, please follow the manufacturer's instructions for operation and chemical use. Do not use solvent-based cleaners.

Excess water should be removed by extracting. When possible, mats should be allowed to dry completely before foot traffic is resumed.
